

WebIntelPro Enterprise X

<https://github.com/>

Overall score: 73/100 (grade C) SEO 80 | Security 77 | Performance 62 | Accessibility 70

Prioritized recommendations

Severity	Area	Issue	Recommendation
HIGH	Accessibility	17/24 images missing alt text	Add descriptive alt attributes (empty alt for decorative images).
MEDIUM	Security	CSP allows unsafe-inline / unsafe-eval	Tighten the CSP; remove unsafe-inline/unsafe-eval and use nonces or hashes.
MEDIUM	Security	1 cookie(s) missing security flags	Set Secure, HttpOnly and SameSite on session/sensitive cookies.
MEDIUM	Performance	High script count (73)	Bundle, defer, or code-split scripts to reduce blocking requests.
MEDIUM	Accessibility	1 form field(s) without a label	Associate a (or aria-label) with every form control.
LOW	Security	No Permissions-Policy	Add a Permissions-Policy header to restrict powerful browser features.
LOW	SEO	Title length 61 chars	Aim for a 30-60 character title.
LOW	SEO	Multiple H1 headings (4)	Use a single H1 per page for a clear document outline.
LOW	SEO	No structured data	Add JSON-LD structured data to enable rich results.
LOW	Performance	Many third-party resources (124)	Audit third-party scripts; lazy-load or remove non-essential ones.
LOW	Performance	Legacy HTTP/1.1	Enable HTTP/2 or HTTP/3 for multiplexed, faster delivery.
LOW	SEO	No sitemap.xml	Publish an XML sitemap and reference it from robots.txt.
